	Abstract	iii
CHAPTER I	BACKGROUND OF THE STUDY	1
1.1	The Economic Paradigm of Development	4
1.2	Shift from economic to social paradigm of development	5
1.3	Quality of population as the focus of development thinking	7
1.4	The role of Culture in development	7
1.5	Limitations of the sectoral planning approach	10
1.6	Indicators of development and Quality of population	11
1.7	Culture and development	13
1.8	Nutrition and development	13
1.9	Nutrition as a complex phenomenon of cultural management of environment	15
1.10	Socio-cultural context of nutrition in the village community	17
1.11	Conceptual dimensions of nutrition in the village community	20
1.12	Limitations of the traditional approach towards nutrition	25
1.13	Need for interdisciplinary perspective about nutrition	26

1.14	Framework of a nutrition education programme	27
1.15	Selection of the village for study	31
1.17	Assumptions	31
1.18	Objectives	32
1.19	Significance of the study	33
	SUMMARY	
CHAPTER II	REVIEW OF THE RELATED LITERATURE	58
2.1	Need for interdisciplinary perspective	59
2.2	Concept of development	59
2.3	Ideas about nutrition and development	65
2.4	Structural analysis	71
2.5	Network analysis	80
2.6	New ideas in nutrition education	86
	SUMMARY	
CHAPTER III	INTERDISCIPLINARITY IN THE PRESENT RESEARCH	103
3.1	Limitations of unidisciplinary studies about nutrition	104
3.2	Limitations of multidisciplinary studies about nutrition	106
3.3	Methodological issues involved in the present study	106
3.4	Need for holistic perspective about nutrition	107
3.5	The need for combining educational and anthropological perspectives to solve the present problem	108
	SUMMARY	

CHAPTER IV	METHODOLOGY	
4.1	Interdisciplinary context of methodology	121
4.2	Selection of the village as the unit of study	123
4.3	Criteria for selection of the agrarian community	124
4.4	Selection of Ghera Mordari as the village for study	127
4.5	Framework of tools	132
4.6	Participatory interviewing for ethnographic exploration	132
4.7	Socio-economic and demographic survey	136
4.8	Exploration of the interpersonal communication networks	138
4.9	Data analysis	146
4.10	Techniques of Network Analysis	149
4.11	Fieldwork schedule	151
	SUMMARY	152
CHAPTER V	ETHNOGRAPHY OF THE VILLAGE	163
	1. Agro-climatic characteristics of the village and its area	164
	2. Geography of the village	166
	3. Ethnic composition of the valley	169
	4.a. Caste system and lineages	172
	b. Caste and lineage based relations within the village	175
	5. Appearance of the people	180
	6. Dress pattern	180

	7. Religious pantheon and beliefs	182
	8. Magic Religion	183
	9. Religious customs and beliefs	186
	10. Family organization	188
	11. Composition and sources of food	190
	12. Foraging behaviour	191
	13. Leadership and politics	192
	14. Settlement patterns	194
	15. History of the community	195
	16. Social composition of the community	199
	17. Development profile of the village	200
	SUMMARY	
CHAPTER VI	SOCIO-ECONOMIC AND DEMOGRAPHIC SURVEY	226
6.1	Social, economic and demographic characteristics of the people in the village	226
6.2	Age composition	227
6.3	Sex and caste wise composition	230
6.4	Educational composition	232
6.5	Caste wise distribution of education	234
6.6	Occupational composition	235
6.7	Income wise composition	238
	SUMMARY	
CHAPTER VII	NETWORK DATA	242
7.1	Outline of information flow in the communication networks of the village	242
7.2	Content of nutritional information	250

7.3	Pattern of interpersonal communication networks	252
7.4	Networking of nutritional information	296
7.5	Networking for the transfer of educational content	297
7.6	Components of the nutrition education programme	300
	SUMMARY
